

# It's Time For the Simpler, Faster Path to Answers

## **X500B QTOF System for Biotherapeutic Analysis**

When you're guiding a biotherapeutic through development, you need answers, fast. You can't be held up by limited instrument time or the availability of a mass spec expert to run standard biologics characterization tasks.

The new, compact X500B QTOF system from SCIEX will simplify your standard characterization workflows with intuitive SCIEX OS and BioPharmaView™ Software, so even novice mass spec users can run intact mass and peptide mapping analyses quickly and easily. You'll get answers to your characterization and comparability questions fast, and you'll free up your advanced instrumentation and mass spec experts for more complex workflows.

Find out how the X500B can show you the easy path to the answers you need at [sciex.com/X500B](http://sciex.com/X500B).
